APE MOOD (APEM)

Official Whitepaper

(Community-Driven Utility Ecosystem on BNB Smart Chain)

---

1. Introduction

Ape Mood (APEM) is a community-driven utility token built on the BNB Smart Chain.
The project is designed to establish a long-term sustainable digital ecosystem focused on:

- Blockchain-based digital services
- AI-integrated applications
- Decentralized digital platforms
- Future Real-World Asset (RWA) integrations

All ecosystem growth is powered through transparent on-chain economics and controlled supply release mechanisms.

No public fundraising or investment programs are conducted by the project.
All development originates strictly from predefined on-chain vesting releases.

---

2. Token Overview

Token Name: Ape Mood
Symbol: APEM
Blockchain: BNB Smart Chain (BEP-20)
Contract Address:
0x1a44C4e6f19EdF8449CCD951Ba2ec2B3e3001C35

Total Supply: 150,000,000 APEM

---

3. Supply Distribution

Long-Term Vesting Reserve
Amount: 148,000,000 APEM
Status: Locked in PinkLock smart-contract vesting

Liquidity Provision (DEX Trading Pair)
 Amount: 1,000,000 APEM

Status: Paired with BNB for initial liquidity and LP tokens locked for 12 months

Community Rewards Wallet

Amount: 1,000,000 APEM

Status: Unlocked, allocated for community rewards, incentives, and engagement activities

Initial Circulating Supply: 2,000,000 APEM
Locked Supply: 148,000,000 APEM

This structure ensures minimal early circulation and long-term controlled emissions.

---

4. On-Chain Lock & Vesting Mechanism

To guarantee zero-dump risk and full transparency, 148,000,000 APEM tokens are secured in a PinkSale PinkLock smart contract with fixed on-chain vesting parameters.

PinkLock Record ID: 1443116
Public Vesting Proof Link:
https://www.pinksale.finance/pinklock/bsc/record/1443116

Lock Title: Ape Mood Locker
Lock Date: 18 January 2026 — 16:30 UTC
 Wallet: 0xa40704Cd36cd5e213A6bDc5F7678D1e9831c9b5e

4.1 Vesting Start and End(2027 to 2041)

First Unlock (TGE):
15 January 2027 — 15:35 UTC

Final Unlock:
27 November 2041

Total Vesting Duration:
From January 2027 to November 2041
Approximately 14 years and 10 months continuous vesting.

No locked tokens enter circulation before January 2027.

4.2 Vesting Parameters

TGE Release: 0.55% of locked supply
Cycle Duration: 30 days (monthly)
Monthly Release: 0.55% per cycle
Per-Cycle Unlock Amount: 814,000 APEM
Total Vesting Events: 182 cycles
Final Unlock Amount: 666,000 APEM

4.3 Vesting Schedule Structure

The vesting smart contract executes:

- First unlock at TGE (15 January 2027)
- One unlock every 30 days afterward
- Each standard unlock releases 814,000 APEM
- Final unlock closes the contract with 666,000 APEM

The full 182-cycle unlock calendar is publicly visible in the PinkLock record link above.

This ensures:

- Predictable monthly emissions

- Fully automated smart-contract release
- No manual interference possible

---

5. Liquidity Lock

1,000,000 APEM allocated for liquidity provision is locked for 12 months.

Purpose:

- Prevent early liquidity withdrawal
- Stabilize market trading
- Protect community participants

---

6. Controlled Unlock Utilization Model

Each vesting unlock follows a transparent internal allocation model:

Buyback and Liquidity Support: 25%
Ecosystem and Application Development: 40%
Community Growth, Advertising and Partnerships: 20%
Core Contributors: 15%

For every unlock:

- Buyback transactions will be published
- Liquidity lock proofs will be shared

No unlocked tokens move without public proof.

---

7. Community-Driven Development Vision

Ape Mood is structured as a community-driven utility ecosystem.

If adoption grows, planned expansion includes:

- Blockchain infrastructure services
- AI-powered decentralized applications
- Digital platform ecosystems
- Real-World Asset (RWA) blockchain integration

Expansion occurs only when ecosystem growth justifies deployment.

---

8. Roadmap

Phase 1 — Foundation (Completed)
Token deployment on BNB Smart Chain
Smart-contract verification
PinkLock vesting implementation
Liquidity lock completed
Website and whitepaper release

Phase 2 — Community Growth
Community building
Transparency reporting system
Marketing and partnerships
Ecosystem planning

Phase 3 — Ecosystem Development
AI-integrated digital applications
Blockchain utility services
RWA integration exploration

9. Security

Ownership renounced

Token contract verified on BscScan
Vesting controlled by PinkLock audited smart contract
No mint function or hidden supply
No manual override on vesting contract

Security principles:

- Immutable vesting schedule
- On-chain verifiable locks
- Transparent transaction tracking

---

10. Disclaimer

APEM does not represent equity ownership.
No guaranteed financial returns are promised.
Token value depends on ecosystem adoption.
Participants assume normal market risk.

This disclaimer ensures the project remains outside fundraising or investment classification.

---

11. Transparency Commitment

All locks publicly verifiable
All unlocks executed by smart contract
Monthly allocation reporting
No off-chain treasury agreements

---

13. Verification Links

---

14. Closing Statement

Ape Mood is built on controlled supply economics, transparent smart-contract governance, and long-term ecosystem vision.

No hidden treasury.
No early dumps.
Only verifiable on-chain growth.
